

RedTeam Flex

as a Procore Alternative

What makes contractors turn to RedTeam Flex?

Procore connects to many different systems for the various functions of a business. This functionality enables them to serve multiple types of businesses, including Owners, General Contractors, Subcontractors, and more.

[RedTeam Flex](#) is a highly customizable construction management solution trusted by many construction professionals, designed to help you manage your construction projects from start to finish.

It serves only one type of business - Commercial General Contractors – a major distinction from Procore. Because RedTeam Flex serves one market, we focus exclusively on expanding capabilities that protect General Contractors, such as:

- No additional modules or hidden costs, promoting repeatable internal processes
- Robust vendor management features
- Distinctive employee menus
- Smart subcontract technology
- Integrated estimating and construction management
- Flexibility to select which features to adopt as your business grows, at no extra cost

Similarities between

RedTeam Flex and Procore

1.

Seamless subcontractor collaboration

2.

Easy to use drawing markups

3.

Robust field management

4.

Unlimited data and storage

5.

Unlimited users

DIFFERENCES BETWEEN REDTEAM FLEX AND PROCORE

All-Inclusiveness

- ✓ **RedTeam Flex** includes all the tools you need to manage your business, from opportunity tracking/business development, bidding, project management, and project financials through closeout - [without add-ons](#).
- ✓ **Procore** requires the use of third-party add-on applications for numerous functions, such as managing leads, vendor credential requirements, and comprehensive financial reports. Unlike Procore, RedTeam Flex offers a place to manage company-owned equipment or vehicles.

Company and Contact Management

- ✓ Clients with whom you have contracts, marketing interactions, and negotiated pricing rates are very different from vendors to whom you issue contracts, track insurance credentials, bidding qualifications, and trades. RedTeam understands the nuances of these relationships. **RedTeam Flex** provides far more robust tools for each entity type and easily allows for entities to fall under multiple types when appropriate.
- ✓ **Procore** incorporates no management of the relationship between your business, your team and outside entities. All contacts, including your own employees, are entered in the same form with no regard to the nuances of the relationship.

DIFFERENCES BETWEEN REDTEAM FLEX AND PROCORE

Financial Management and Reporting

- ✓ **RedTeam Flex** is General Contractors' most comprehensive and robust [financial management tool](#). From Estimating to Budget Management within individual Projects, such as the latest revised Estimated Cost at Complete, to high-level business financials, such as Work In Progress, cash flow and cash position, and project accounting reporting. The data you get by managing projects with RedTeam is second-to-none.
- ✓ Unlike **Procore**, RedTeam Flex generates a Work in Progress (WIP) report and includes comprehensive financial reporting.

Contract Discipline

- ✓ **RedTeam Flex** focuses on contract formation as an existential business process. We strive to ensure contract consistency and completeness by utilizing automation to displace manual, error-prone workflows. RedTeam Flex supports best practices for contract compliance (i.e., allowing you to check and require Vendor insurance credentials prior to executing a subcontract with them). The Roles and Permissions in RedTeam Flex are so comprehensive and flexible to ensure that users do and see exactly what they should do within a project.
- ✓ In contrast, **Procore** doesn't incorporate the same level of stringent control over roles and permissions for viewing and sharing. Procore allows for fewer specific distinctions between roles, which could lead to mistakes.

So, why are contractors turning to RedTeam Flex as a Procore alternative?

1 Subcontractor Management

RedTeam Flex offers a host of tools for [subcontractor management](#). All the companies you deal with are separated within RedTeam Flex's menu as Vendors, Clients or Third Parties for easy filtering and reporting, viewing historical data and tracking their current work. Procore has limited tools for subcontractor management. In fact, they house all companies in a single area, with no way to easily distinguish between entity types.

2 We come from construction

RedTeam Flex was truly [born out of construction](#). RedTeam's founder is a general contractor who built the solution to help his own construction company manage the inherent risk of this business. All of the RedTeam Flex tools were developed with risk mitigation in mind.

3 You get 100% of RedTeam Flex

When you invest your business in RedTeam Flex we give you every feature of RedTeam Flex at [no extra cost](#). No additional modules. No hidden fees.

4 End-to-end collaboration

RedTeam Flex is a single solution that offers smooth collaboration among your entire team, tailored to your project needs, from field to office. Documents, images and drawings are uploaded once with no double entry. Metadata capture and timestamps all comments and views, giving you complete transparency.

MORE REASONS WHY REDTEAM FLEX IS A GOOD ALTERNATIVE TO PROCORE

If you're still wondering [why you should choose RedTeam Flex](#) instead of Procore, the comparison guide below will help clarify and guide your purchase decision.

RedTeam Flex

Procore

**Detailed financial reporting.**

RedTeam Flex features robust, detailed financial visibility and reporting, including a WIP report.

Limited financial reporting.

Procore offers only basic financial information, with no key visibility and reporting and no WIP report.

**RedTeam Flex is truly all-inclusive.**

No modules. All features are included, at no additional cost.

Costly add-ons and integrations are required to match full RedTeam Flex functionality, including:

Opportunities (CRM), Schedule Building, Lien Waiver Tracking, and Equipment Tracking.

**RedTeam Flex provides more integrated bidding, estimating, and budget-building tools.****Procore's estimating tool is a module that needs to be purchased and added separately.****RedTeam Flex is more cost-effective.****Procore is more expensive than Flex.****Very granular permissions.**

Within RedTeam Flex, project team members are enabled to access and interact with exactly what they need to complete tasks, no more and no less.

Less granular permissions.

Procore's permissions reach a different level of specificity, potentially allowing outside users to view or interact with data they should not be accessing.

**Contractor-friendly pricing.**

One price buys you the entire RedTeam Flex solution and all its features. No additional modules or hidden costs.

Complicated pricing structure.

Procore is segmented into product packages, or modules; each module is priced differently.

Is RedTeam Flex

right for your business?

RedTeam Flex has [best-in-class vendor management features](#) and streamlined project management workflows. With RedTeam Flex, general contractors in the commercial construction space and specialty contractors can:

- ✔ Establish unit price rates by client.
- ✔ Set up enforceable workflows embedded into the platform and create your own filtering criteria and custom fields to organize and sort through data to make data-driven decisions.
- ✔ Leverage the change order workflows that guide your project management team on the steps needed for a complete change order package.
- ✔ Create an estimate complete with embedded unit prices and estimate detailed reports.
- ✔ Easily send templated proposals adhering to company-specific verbiage and manage the entire contract in one software solution.
- ✔ Keep track of onsite progress with data and media seamlessly from the jobsite.
- ✔ Submit AIA-style billing for work completed, including any related backup documentation.
- ✔ Manage the entire contract in one software solution.
- ✔ Communicate information without the use of personal emails, ensuring data is properly captured.
- ✔ Automate all of your processes, allowing your team to manage more projects with less effort.

...and much more!

What our clients are saying...

"We came to RedTeam Flex having used several other software that just didn't have the breadth that we needed... RedTeam Flex has allowed my entire team to pull together and operate in one software which is pretty nice."

David Hillmer, CEO
Pioneer Contracting

"Since implementing RedTeam Flex, its technology has helped the office stay connected with the field and manage projects remotely when we need it most. By having all of our critical information in a single environment, RedTeam Flex has streamlined interaction within our company, ultimately providing greater efficiency."

Tim Smith,
Wharton-Smith

I have experience with both RedTeam Flex and Procore from other companies before starting my own, and I knew I was going to have construction project management software but wasn't sure which one. After having experience with those two, I chose RedTeam Flex because it's more user-friendly and significantly less expensive."

Bennet Sebastian, Founder
Invision Construction & Development
